Manufacturing engineer (work)

Ektam Makine

As an employee at Ektam Makine we can provide our consumer that complete bottling lines, filling and capping machines, combi system blowing and filling machines, mixing and carbonating units, bottle cleaning units, labelling machines, pasteurizing warming and cooling tunnel, carton packing and uncasing machines, palletizing and depalletizing machines and conveyor systems.

My responsibilities are tend to manufacturing and priority thing is check up the production process flow chart and develop it.

I'm entitled for a write a material request slip at Ektam Makine. So I'm so good at Technical Drafting understanding and make a manufacturing process with chronologically and material selection like that steel, stainless steel or ultra high molecular density polyethylene castamide polyamide igus peek. I think I should be able to make a better career with a pair colleague at office. So I'm waiting for a new job offering.
