Board of Public Examinations

Projects

• SMART AMBULANCE

While comparing with other ambulances the SMART AMBULANCE consists of some special features like PIC, LM35 and heart beat sensors which allows patients to measure their vital signs, such as heart rate and temperature, and provide the health care professionals with the facility to remotely monitor the patient's vital signs quickly and easily.

• SIMPLE RAIN ALARM

It is a very simple rain alarm circuit which is designed using mainly a transistor, water sensor and a 555 timer IC. The circuit which detects the rain water and alarm while sitting inside a home, and also play an important role in various industries such as automobile, irrigation and wireless communication.
